### **Projects Summary:**

#### **1. Project Name: J.Crew (<https://www.jcrew.com/>)**

**Project Details:** J.CREW is an iconic American brand known worldwide for its sophisticated, fun clothing and accessories to live, work, and play in. It has expanded to hundreds of specialty retail and over 150 outlet stores across the world, with robust online business and new stores opening regularly. J.Crew has set the industry standard for quality, design, and style by sourcing fine fabrics from top-notch domestic and international mills. I worked as a frontend developer on a full-time basis for the period of 3 months.

**Technology Stack Included:** Node.js, Next.js, AJAX, ReactJS

#### **2. Project Name: Shmoop (<https://www.shmoop.com/>)**

**Project Details:** Shmoop was founded in 2009, with the idea that learning was just too hard. It provides a teaching method centers on the belief that students can love learning, and humor can be the catalyst of engagement. To support this, they build tools that give all students equal opportunity to succeed through easing the stress of the learning

environment. I along with a team of developers worked on a contractual basis with the team Shmoop, where I as a frontend developer on the application as majorly used ReactJS, HTML5, CSS for the development.

**Technology Stack Included:** React.js, Bootstrap, MomentJS, HTML5, CSS3, AJAX

### **3. Project Name: Zappyrent** (<https://www.zappyrent.com/it>)

**Project Details:** Zappyrent is an online marketplace that digitalises the entire renting process of medium to long-term accommodations with cutting edge technology. It developed a platform where tenants can visit any accommodation 24/7 from their sofa with a brand new experience of 3D Virtual Tours, can reserve any accommodation online without having to send money to unknown landlords or pay any commission fees.

**Technology Stack Included:** HTML5, Sanity, SCSS, Webpack, React.js

### **4. Project Name: SoundBetter** (<https://soundbetter.com/>)

**Project Details:** SoundBetter, a music production marketplace for artists, producers, and musicians to connect on specific projects; and for people who are looking to distribute music tracks to those who want to license them. I worked on the frontend part of the application and developed various React components.

**Technology Stack Included:** React, React-Redux, React-Hooks, Bootstrap

### **5. Project Name: Williams The Jewellers** (<https://www.williamsthejewellers.com.au/>)

**Project Details:** Williams The Jewellers is a member of Australasia's largest jewellery group Nationwide Jewellers. It specialises in jewellery services such as repairs, restoration and custom design to create unique pieces. It specialises in a wide range of jewellery including manufacturing stylish quality jewellery to suit your style and budget. All manufacturing is carried out on the premises by our qualified team of jewellers.

**Technology Stack Included:** Node.js, Angular.js 7.2, Express.js, Webpack, Lodash, Moment.js

### **6. Project Name: ThatApp** (<https://thatapp.io/>)

**Project Details:** ThatApp enables you to backup your entire organization's data, ensuring protection moving forward. Schedule snapshots, restore data and take peace of mind that your data is safe and sound. With live data interaction you'll be able to easily manipulate your data to better organize functionality and productivity across all of your platforms.

**Technology Stack Included:** AJAX, Bootstrap, React.js, MongoDB

### **7. Project Name: Cuelr** (<https://cuelr.com/>)

**Project Details:** Cuelr's tools let you discover new music trends curated by the worlds leading cultural experts with real-time updates. It has total search customization and an

interactive map revealing an uncompromised birds eye view onto the global music scene. It's the easiest way to spot relevant new music, first.

**Technology Stack Included:** Angular.js, JavaScript, HTML5, CSS/SCSS

**8. Project Name: Hanai World** (<https://hanaiworld.com/>)

**Project Details:** Hanai World is a social mixed reality platform where individuals can meet, exchange and connect through a wide variety of events and gatherings.

**Technology Stack Included:** Pure JavaScript, HTML, CSS, Sentry
